### **DETAILED ACTION**

1. In view of amendment filed January 3, 2005, new claims 8-20 have been added.

Claims 1-20 are pending.

2. In view of amendment filed January 3, 2005, the rejection of Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, is withdrawn. Further, the rejection of claims 1-7 under 35 U.S.C. 103(a) as being unpatentable over Kawakubo et al. (US 2002/0169268 A1) is withdrawn.

### ***Allowances***

3. Claims 1-20 are allowed.

4. The following is an examiner's statement of reasons for allowance:

As of the date of this office action, the examiner has not located or identified any reference that can be used singularly or in combination with another reference including the closest prior art of Kawakubo et al. (US 2002/0169268 A1) to render the present invention anticipated or obvious to one of ordinary skill in the art.

Art Unit: 1713

The closest prior art Kawakubo et al. (page 4, Table 1) discloses a process for polymerizing vinyl chloride in a reactor equipped with a condenser for removing heat. Further, kawakubo et al. (page 2, paragraph 0026) disclose anti-foaming agent such as polyoxyalkylene glycol-based anti-foaming agents such as polyoxyethylene, polypropylene oxide copolymers. However, Kawakubo et al. are silent on the specific molecular weight and the ethylene oxide to propylene oxide molar ratio being claimed. Therefore, it would not be apparent to one of ordinary skill in art to use the process teachings of Kawakubo et al. to obtain the invention of claims 1-20. Further, in view of applicants' "unexpected results" (Specification, Page 13, Table 1) in obtaining the combination properties of desirable bulk specific gravity and volume resistivity from the claimed specific molecular weight and the ethylene oxide to propylene oxide molar ratio, applicants have clearly shown the criticality of the claimed specific molecular weight and the ethylene oxide to propylene oxide molar ratio. Claims 1-10 are allowed.

In light of the above discussion, it is evident as to why the present claims are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
